

Dear parents of rising 3<sup>rd</sup> graders,

May 18, 2017

Greetings! Next year will be an exciting and challenging year as your child takes on 3<sup>rd</sup> grade Math. The curriculum has been designed to prepare your child to meet the rigorous competitive field of mathematics and be prepared for 3<sup>rd</sup> grade math and beyond. Some of the important skills that your child will need to have in order to be ready for 3<sup>rd</sup> grade include: adding and subtracting two-digit whole numbers, adding and subtracting three digit whole numbers, displaying data in graphs, place value, writing numbers, skip counting, telling time on a clock, finding measurement of objects with a ruler, making and using line plots, counting money, and recognizing two-dimensional shapes.

This packet has been put together with those skills in mind. To help your child strengthen and keep their math skills sharp over the summer, I would like you to complete this packet. If your child works two to three pages each week, they will have the packet completed by the beginning of the school year. This packet will be your child's first grade in math class. It is due the first full week of school to their third grade teacher, Ms. Bittengle. If you feel that your child needs additional practice beyond what is provided in this packet, there are several resources available online and I would be more than happy to share them with you, please just send me an e-mail.

In order to receive full credit for this packet, the child must show all work where applicable. No calculators may be used in completing this packet. Answers with no work (where applicable) will receive no credit.

I hope that you have a fun and safe summer. I look forward to the opportunity to teach your child in August!

With hugs,  
Ms. Bittengle
