Lessons

Art

Following our dentist visit last week, the children were so excited to create their own tooth painting. Each student was given a yellow tooth and used a tooth brush to create a sparkling white tooth! We also had a great time painting with broccoli today to conclude our nutrition lesson.

Science

This week's science experiment was extra germly! We discussed the importance of keeping our hands clean. Glitter took the place of germs as we took turns high-fiving. We washed our hands after to stay healthy!

Language Arts

We learned all about the letter Z this week with a Z is for zebra craft.

Math

The children learned about sequencing with a craft based off of the book, The Napping House. We also explored measuring centers and used string to see how tall we have gotten.

Highlights

We loved painting with broccoli and exploring our sand sensory bin!
